

RESEARCH TRIANGLE PARK, N.C., June 16, 2008

Tryton Medical, Inc. announced today that it has appointed Olivier Delporte Vice-President of Sales and Marketing for Europe. Founded in 2003, Tryton Medical is the leading developer of stents that are designed to definitively treat bifurcation lesions.

Mr Delporte joins Tryton Medical after a successful career with Guidant and Abbott Vascular. Mr. Delporte has extensive Sales & Marketing experience in the peripheral and coronary vascular businesses, having held various sales and marketing management positions within Guidant and Abbott Vascular over the past 6 years. Most recently he was the Marketing Manager in charge of the Drug-Eluting Stent line of products for the Europe, Middle East and Africa (EMEA) region. During that assignment he successfully launched the XIENCE V drug-eluting stent. Mr Delporte was also responsible for the launch of the MULTI-LINK FRONTIER bifurcation stent in the EMEA region. Mr. Delporte earned a Commercial Engineering Degree from the Université Catholique de Louvain and an MBA from the University of Chicago.

"I am thrilled about this opportunity because I believe the Tryton Side-Branch Stent(TM) will redefine the treatment of bifurcation lesions," said Mr. Delporte. "Tryton's ease-of-use and stellar clinical results are impressive and I strongly believe that the Tryton Side-Branch Stent™ will not only benefit patients but will also enable physicians to treat these complex lesions much more easily. I look forward to implementing the company's European commercialization strategy."

"We are delighted to welcome Olivier to Tryton Medical during this important time in the company's development," said Greg Davis, President and Chief Executive Officer of Tryton Medical. "As we prepare for our imminent product launch across Europe Olivier's proven track record, expertise in the bifurcation field and leadership skills will enable us to build a first class team and achieve maximum success."

About Tryton Medical, Inc.

Tryton Medical, Inc. was founded in 2003 by Aaron V. Kaplan, M.D. (Associate Professor of Medicine at Dartmouth Medical School/Dartmouth- Hitchcock Medical Center) and Dan Cole to develop stents for the definitive treatment of bifurcation lesions.
